

Model SF-1000

Standard Flow (0.75gpm)

"This system was evaluated to a test capacity of 2000 gallons, 200% of the rated capacity of 1000 gallons"

Chemical Reduction System for your home, office and business

5 Stage Exclusive High Flow Design

Stage 1: Built-in 5.0 Micron Pre-Filter - Wrapped completely around the carbon block to filter dirt, sediment, filterable iron etc for increased cartridge life

Stage 2: Fine Filtration - Thick Compression molded powdered activated carbon block filters
Class I reduction of particles >0.5 Micron

Stage 3: Adsorption - Specially formulated High Capacity carbon with over **650,000 square meters** of adsorption surface area

Stage 4: Filter Protection - Silver Zeolite technology **blended throughout** the filter for efficacy & longevity

Stage 5: Scale Control* - Polyphosphate spheres are slowly released to provide **protection against hard water scale** build up in water using appliances.

*claim not certified by WQA

Replacement cartridge PN#RC-SF-1000

Superior Performance

California Certification Number 3329

Exclusive Patented Quick Change Cartridge

- Sanitary Sealed quick change cartridge 1/4 turn, no tools required

Complete Installation Kit

- Under-sink to existing cold sink faucet (all quick connections)

Lead Free Design

- Virgin polypropylene materials and tubing - no lead

Natural Minerals not filtered out of water!

Now with Certified Micro-plastics reduction

Model SF-1000

High Flow (0.75 gpm)

Chemical Reduction System for your home, office and business

Certified Performance

This system certified by WQA to CSA B483.1, NSF/ANSI 42, 53, 401, NSF/ANSI/CAN372

This system certified by IAPMO R&T to CSA B483.1, NSF/ANSI 42 & 53

For Specific performance claims as verified below and substantiated by test data

NSF/ANSI Standard 42: Aesthetic Effects

Chemical Unit

Taste and Odor

Aesthetic Chlorine

Mechanical Filtration Unit

Particulate Reduction Class I, 0.5 micron

NSF/ANSI Standard 53: Health Effects

Chemical Reduction Unit

Lead

Mechanical Reduction Unit

Turbidity

Cyst

NSF/ANSI/CAN 372 - Low Lead Content , 0.25% wetted parts

NSF/ANSI 401 - Microplastics Reduction

* Claim not certified by WQA

The system & installation shall comply with applicable state & local regulations

Operating Specifications

Min/Max working pressure:

30 psi (2.1 bar)/125 psi (8.6 bar), nonshock

Temperature: 35-100° F (2-38° C)

Service flow rate .75 gpm (2.85 Lpm)

Rated Service Capacity: 1000 gallons (3800 L)NOTE

"The end-user should not attempt to regenerate and reuse spent media from this product"

Product performance is dependent upon incoming water conditions. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts.

The contaminants or other substances removed or reduced by this water filter device are not necessarily in your water.

Typical Installation Options:

Existing Cold Faucet Installation

Undersink Separate Faucet Installation

Warranty:

12 months from date of purchase or 24 months from date of manufacture. See warranty sheet for details

Note: Separate faucet recommended for installation at kitchen sink for single filter head.

This system is a great addition to any home, office or business. Its flow rate is 1.5 x the competition without scarifying performance. The capacity for the average family of 4-6 is a 1 Year Supply of drinking water.

Ideal system for homes that do not want to add a separate dispensing for the bath or bar area.

Connecting to the existing cold sink faucet saves cost of purchasing a separate dispensing tap, installation time & design issues without the need to drill holes in your countertop.

Great for bath or bar areas and for point of use water cooler filtration
